## OUTDOOR POOL DECK

### HEATED POOL

The water temperature ranges throughout the year. April can drop to lows in the 50s on average where during prime season it will fluctuate in the 70s. As temperatures drop overnight it will decrease the pool temperature which will gradually warm up during the day. The pool heater allows the pool to maintain a comfortable water temperature throughout your trip. The pool is serviced mid-week and on checkout days.

### ABOUT THE POOL

Our rental has a Salt Water pool. This typically will provide a more natural swimming experience and won't irritate your eyes or skin. It also will not have a harsh smell found with some chlorine pools. Our water temperatures typically run between 78 and 82 degrees. Any cooler can feel chilled when you exit the pool. Any warmer than 82 and the pool will feel like bath water and may cause algae blooms.

## OUTDOOR POOL DECK

### GAS FIREPIT

The gas firepit is a great addition to use with the family when the sun goes down. As you approach the firepit the automatic lighting will brighten the area. Decorated with light-blue sea glass the unit has an automatic starter and shutoff for safety. It also has seating for four to sit back and enjoy roasting smores', taking in the fresh air or staring at the stars.

### HOT TUB AREA

Unlike the heated pool the hot tub has controls which allow you to adjust the temperature. It is kept around 102 degrees, as any warmer may limit the time you can spend in it. This model has adjustable headrests, a built in waterfall feature as well as multiple massaging jets which are adjustable per seat. The attached lid is connected for easy access to open and close the hot tub. Adjacent to the hot tub is the outdoor bar area which has a mini refrigerator and microwave. Service appointments are also mid-week and checkout days.

## WHAT TO EXPECT

### THERMOMETER

To keep track of the pool temperature we have a floating wireless Inkbird thermostat in the pool. It will continually monitor in real time the temperature of the water throughout your stay.

Inkbird wireless floating pool gauge

### DIGITAL DISPLAY

Located in the kitchen you will see the display to your left. This will show the water temperature as well as the outside temperature before you enter the pool. The bottom shows the indoor temp as well as the humidity and the top is the pool temp.

### POOL LIGHTS

We have submersible LED Lights. These are IP68 waterproof that are attached underwater throughout the pool. The lights are controlled by remote control allowing you to light up and adjust the color of the pool at night.
